## **Sun Coating Company named a Whitford Recommended Coater**

September 2011, Plymouth, MI. Sun Coating Company has been developing and applying fluoropolymer and innovative coating solutions since 1963, and has been working with Whitford since 1970. They specialize in applying technologically advanced coatings to enhance and improve the properties for release, non-stick, low friction, abrasion-, wear- and corrosion-resistance, dry-film lubrication, galling, noise reduction, high temperature and FDA-compliance.

Whitford, makers of the world's largest, most complete line of fluoropolymer coatings, has named Sun Coating Company as one of their Recommended Coaters. Criteria to be a WRC (Whitford Recommended Coater) includes knowledge of and experience in applying Whitford's coatings, attendance at one of Whitford's training programs (Whitford University), and having a solid quality control program in place.

Says Mark Tate, Vice President of Sun Coating Company: *"Sun Coating Company has enjoyed its relationship with Whitford over the years and we take great pride in being able to offer Whitford's complete line of coatings. We can only hope for this partnership to continue to grow. Again, thank you for recognizing Sun Coating Company as one of Whitford's recommended coaters."*
